Battery LXT® 9.0Ah

Li-ion • 18V • 9.0Ah • BL1890B

BL1890B 9.0Ah Li-ion battery for 18V LXT® tools

Makita BL1890 LXT is an 18V 9.0 Ah Lithium-Ion battery that delivers extended run time for all compatible Makita 18V LXT cordless tools.

TECHNICAL

SPECIFICATIONS

Voltage	18V
Energy Capacity	162Wh
Cell Type	3.6V / 3.0Ah /
Cell Configuration	Size 18650
Charging Time (DC18RC)	15 (3P5S)
Charging Time (DC40RA + ADP10)	85 min
Net Weight	55 min
	1.0 kg

USER BENEFITS

- **Extended Runtime:** The primary benefit of the 9.0Ah capacity is significantly longer operating time, which is ideal for high-drain tools like grinders, saws, and rotary hammers, minimizing downtime for frequent battery changes.
- **Intelligent Protection:** The battery is equipped with STAR Protection Computer Controls, a communication technology that allows the tool and battery to exchange data in real time to protect against overloading, over-discharging, and overheating.
- **Durable Construction:** It features an impact-resistant outer case and a shock-absorbing inner liner, engineered to withstand the demanding conditions of a job site.
- **User-Friendly Indicators:** An integrated 4-LED fuel gauge allows users to monitor the remaining charge level at a glance, helping in work planning and avoiding unexpected power loss.
- **Optimized Charging:** The built-in memory chip communicates usage history with the charger (such as the DC18RC rapid charger) to optimize the charging process, resulting in an approximate charge time of 85 minutes.
