

Circular Saw Blade 185X30 mm D-65589

A tungsten carbide tipped (TCT) circular saw blade designed for fine finishing cuts in a variety of materials.

TECHNICAL SPECIFICATIONS

Diameter	185 mm
Bore Size	30 mm
Tooth	60
Maximum RPM	8300
Quantity	1 pc

USER BENEFITS

- Best for: This blade excels at cutting thin aluminum, MDF, PVC, and laminated chipboard, delivering a clean and straight edge.
- Efficient cutting: Makita states that the D-65589 blade cuts 15% quicker than an equivalent blade, allowing for faster work.
- Triple Chip Grind (TCG): The TCG teeth feature a combination of flat and trapezoidal teeth. This design balances cutting force and improves chip flow, which helps prevent chipping in brittle materials.
- Durability: The blade is fitted with tungsten carbide tips for long-lasting sharpness and increased resistance to wear.
