## USER BENEFITS

- Tungsten Carbide Tips (TCT): The bits are equipped with durable TCT cutters for a longer bit life, even with heavy use.
- Brad point centring tip: A sharp, precise centring tip guides the bit, preventing it from drifting for more accurate and consistent drilling.
- External scribing cutters: Two external cutters ensure clean-cut holes by scoring the material's surface, which minimizes splintering.
- Flat-bottom holes: The design is optimized to create precise, flat-bottomed holes, which is crucial for mounting concealed hinges correctly.
- Efficient chip removal: The design helps to clear debris effectively, which allows for smoother and faster drilling.
- High-quality construction: The bits are designed to provide professional-grade performance and durability for demanding woodworking tasks.
