

D-74706

TCT Hinge Drill Bit 22x77 mm

22 x 77 mm TCT Hinge Drill Bit

A Makita 22mm TCT (tungsten carbide tip) concealed hinge cutting drill bit.

TECHNICAL

SPECIFICATIONS

Diameter (D) 22mm

Overall length 77mm

Working length 77mm

Shank size 10mm

Quantity 1pc

USER BENEFITS

- Brad point centring tip: A short, pointed tip prevents the bit from wandering at the start of a cut, ensuring accurate hole placement.
- Two external scribing cutters: These cutters score the material's surface just before the main cutters engage, preventing splintering and chipping for clean-cut holes.
- Tungsten Carbide Tipped (TCT) blades: The durable TCT cutting edges provide an extended service life and consistent performance, even in hardwoods and laminated materials.
- Smooth, flat-bottomed holes: The bit is engineered to create a perfectly flat base inside the hole, which is essential for properly installing concealed hinges.
- Optimal for various materials: It is suitable for a wide range of materials, including wood, chipboard, plywood, and laminated MDF.
- Efficient debris removal: The design effectively clears debris during drilling, leading to smoother and more efficient operation.
