TCT Hinge Drill Bit 23x77 mm

23 x 77 mm TCT Hinge Drill Bit

A Makita 23mm TCT (tungsten carbide tip) concealed hinge cutting drill bit.

TECHNICAL

SPECIFICATIONS

Diameter (D) 23mm
Overall length 77mm
Working length 77mm
Shank size 6.35mm
Quantity 1pc

USER BENEFITS

- Brad point centring tip:Â This short, pointed tip prevents the bit from wandering at the start of a cut, ensuring that the hole is accurately placed.
- Two external scribing cutters:Â These cutters score the material's surface just before the main cutters engage, preventing splintering and chipping for exceptionally clean-cut holes.
- Tungsten Carbide Tipped (TCT) blades:Â The high-quality TCT cutting edges are designed for durability and a long service life, allowing for consistent performance even on tougher materials.
- Smooth, flat-bottomed holes:Â The two TCT cutters work in tandem to create a perfectly smooth, flat base inside the hole, which is essential for proper hinge fitment.
- Efficient chip removal:Â The bit is designed to effectively remove debris, which leads to cleaner cuts and smoother drilling action.
- Versatile application:Â The bit is suitable for a wide range of materials, including wood, chipboard, plywood, and laminated MDF.
