

Circular Saw Blade 260X30 mm D-81804

A tungsten carbide tipped (TCT) circular saw blade designed for fine finishing cuts in a variety of materials.

TECHNICAL SPECIFICATIONS

Diameter	260 mm
Size	30 mm
Tooth	100
Maximum RPM	5870
Quantity	1 pc

USER BENEFITS

- Triple Chip Ground (TCG): The teeth have a TCG tooth configuration, designed for finer, splinter-free finishing cuts.
- Ideal for non-ferrous metals: The high tooth count makes it suitable for cutting through materials like aluminum and PVC without causing chipping.
- Suitable for wood-based panels: It is also recommended for achieving clean, smooth cuts in wood-based materials such as chipboard and MDF.
