

Cordless Magnetic Light LXT®

DML819

18V LXT • XPT

Cordless Magnetic Light powered by 18V LXT® Li-Ion battery.

Delivering up to 1,200 lumens of bright illumination, the DML819 Magnetic Light provides reliable lighting wherever the job takes you. Its compact design with powerful base magnets allows secure attachment to steel surfaces for convenient hands-free lighting.

Dimensions (LxWxH)
Net Weight

Color Temperature: 5,000 K
High / Med. / Low: 1,200 / 800 / 500 lm
at 0.5m from the light source,
High / Med. / Low: 1,750 / 1,150 / 700 lx
at 1.0m from the light source,
High / Med. / Low: 400 / 250 / 150 lx
High/Med./Low: 9/14/22 hours (w/ BL1860B)
178 x 91 x 161 mm (w/ BL1860B)
0.38 kg (w/o battery)

USER BENEFITS

- **Magnetic Strength:** The base features powerful magnets, allowing you to "stick" the light to car hoods, server racks, or steel beams. This keeps both your hands free for tools rather than holding a flashlight.
- **Extreme Adjustability:** Because the head folds 180° and swivels 300°, you can attach it to a side wall and still point the beam exactly where you're working, even in cramped engine bays.
- **Diffusion Lens:** Unlike standard LEDs that create "hot spots" or harsh glares, the DML819 uses a diffusing lens. This softens the light and minimizes overlapping shadows, making it much easier to see fine details during long shifts.
- **Daylight White (5,000K):** The color temperature mimics natural light, which is ideal for identifying wire colors or spotting fluid leaks accurately.
- **Battery Protection:** It doesn't just die unexpectedly; the light dims automatically as a warning when the battery is nearly empty, giving you time to finish a task or grab a spare.
- **Auto-Off Safety:** The light shuts off automatically when the head is folded closed, preventing you from accidentally draining the battery while it's sitting in your tool bag.
- **XPT Technology:** It is engineered for "Extreme Protection." This means if you're working in a dusty workshop or a rainy outdoor site, the internal components are shielded against dust and dripping water.
- **Compact Storage:** It folds into a flat, slim profile, making it easy to slide into a side pocket of a tool bag compared to bulky tripod lights.
