

Top Handle Jigsaw XGT®

JV002G

40V MAX • BL Motor • 0–3,500 SPM

Brushless Top Handle Jigsaw powered by a 40V MAX Lithium-Ion Battery.

High accuracy, efficiency, and comfort. Delivers excellent cutting performance using a powerful brushless motor with 3 orbital settings plus straight cutting for faster and more precise results across various materials. The top handle design enhances user control and ergonomics.

USER BENEFITS

- Constant speed control maintains cutting speed under load.
- Tool-less blade clamp with blade holding lever allows for quick one-hand blade changes.
- Soft no-load mode disables running when not cutting for better precision and less vibration.
- Compact, lightweight design for enhanced maneuverability.
- 3 orbital settings plus straight cutting for high-performance, accurate cuts.
- Variable speed control dial lets users match the speed to each application.
- Improved visibility and user-friendliness, including features for easy blade alignment.
