

Cordless Vacuum Cleaner

VC013GL

40V MAX XGT • BL Motor • Wet/Dry • AWS • 15kPa • HEPA

A powerful, professional-grade 40V wet and dry vacuum designed for worksite and industrial use.

The Makita VC013GL is a powerful 40Vmax XGT cordless, brushless vacuum cleaner engineered for professional-grade wet and dry cleaning on construction sites and industrial settings. It provides strong suction, wet and dry functionality, and includes an Auto-start Wireless System (AWS) for seamless integration with other compatible tools.

TECHNICAL

SPECIFICATIONS

Suction Power	25 - 165 W
Max Sealed Suction	4.5 - 15 kPa
Air Volume	1.0 - 2.0 m ³ /min
Capacity	Dust / Water: 7.5 / 4.5 L
Continuous Use	22 - 120 min. (Battery: BL4050F)
Dimensions (L x W x H)	400 x 251 x 282 mm
Net Weight	4.3 kg (without battery)

USER BENEFITS

- Powerful suction: A brushless motor delivers up to 165W of maximum suction power, equivalent to a corded model, and a maximum sealed suction of 15 kPa for efficient dust and debris extraction.
- Wet and dry cleaning: The VC013GL is capable of handling both wet and dry dust and debris, with a tank capacity of 7.5L for dust and 4.5L for water.
- HEPA filtration: A HEPA filter captures 99.97% of particulates 0.3 microns and larger, ensuring high-quality filtration for a cleaner work environment.
- Auto-start Wireless System (AWS): This feature allows the vacuum to run automatically and in sync with a power tool that also has an AWS chip, for on-demand dust extraction.
- Blower function: The unit can be converted into a blower by attaching the hose to the exhaust port, offering greater versatility.
- Variable suction control: A dial allows the user to adjust the suction power to suit different tasks and conserve battery life.
- Long runtime: When equipped with a BL4050F battery, the vacuum can operate for up to 120 minutes on a single charge.
- Durable design: The vacuum features XPT (eXtreme Protection Technology) for improved water and dust resistance, making it suitable for harsh job site conditions.
