

Cordless Screed

VL001G

40V MAX XGT • 550 W • 900 mm • 1,400 mm • 1,800 mm blades

A professional-grade 40V Max XGT Cordless Brushless Concrete Vibrating Screed.

Makita UC003G Top Handle Chainsaw and the Makita VL001G Concrete Vibrating Screed highlight how both tools utilize 40V Max XGT battery technology to deliver heavy-duty commercial performance without the drawbacks of petrol equipment.

TECHNICAL

SPECIFICATIONS

Working width:	900 / 1,400 / 1,800 mm (35-1/2 / 55 / 71?)
Vibrations per minute :	11,000 min? ¹
Continuous use:	150 min.
Continuous use (Battery):	BL4040F
Continuous use (Attachment):	1,800 mm blade

USER BENEFITS

- Protects User Health: Eliminates toxic exhaust fumes entirely, allowing contractors to safely pour and level concrete indoors, in basements, or in tightly enclosed residential spaces.
- Prevents Hand-Arm Vibration Syndrome: The offset weight is positioned directly at the blade base, keeping 11,000 VPM concentrated in the concrete slurry while isolating the rubber handles from harsh vibrations.
- Saves Cleanup and Repair Costs: Sealed switches and a liquid-tight battery compartment prevent wet cement and corrosive lime dust from ruining the electronics, extending the tool's lifespan.
- Delivers a Flawless Finish: Constant speed control prevents the motor from bogging down under heavy slurry, ensuring uniform aggregate consolidation and fewer structural weak spots.
- All-Day Working Autonomy: Pairing the tool with a backpack power pack (PDC1200) offers up to 20 hours of continuous runtime, meaning you can finish massive commercial slabs on a single charge.
